Setting Up StatBroadcast with PrestoStats

Transmitting stats to StatBroadcast from PrestoStats requires retrieving StatBroadcast's FTP settings and entering them into Presto Stats' platform.

This simple setup should take less than five minutes to complete. Once you have completed Steps 1 and 2, you will only need to complete Step 3 for future events.

1-855-838-2841

https://support.statbroadcast.com

support@statbroadcast.com

1. Initial Setup

To connect PrestoStats to StatBroadcast, you'll need to setup StatBroadcast as a Live Stats Partner in PrestoStats.

This should only need to be done once per season.

1.1 Open a browser to ftpsettings.statbroadcast.com and login when prompted

Sign in to start		
Username		-
Password	•	
Remember Me	Sign	In

1-855-838-2841

https://support.statbroadcast.com

support@statbroadcast.com

1.2 Write down the FTP server, Username and Password displayed

Note: Values have been blurred for security purposes.

You will need to enter those into PrestoStats' Partner setup in the next step.

Write in the values here for quick reference: FTP server:

Username:			
Password [.]			

Note: on some computers, using the copy+paste function will result in errors on the Presto side. You may need to type this Path value in by hand on the Presto site.

support@statbroadcast.com

1.3 Find the XML Path for your current game

Scroll down below the ftp information to the 'FTP Filenames/Paths' section and find the XML path for your game. Typical XML paths for StatBroadcast follow the following format: [your school code] / [event id number] .xml

Important note: Every game/event on StatBroadcast will require setting a different path in PrestoStats setup.

Please note that you must have scheduled games for data to appear in the Filenames grid. If your grid is empty, please schedule some events first.

For quicker reference, you can use one of the export buttons (PDF, CSV, Excel, Print) to save this information for later.

support@statbroadcast.com

2. Setup StatBroadcast as a Live Stats Partner on PrestoStats

You will need to update the XML Path value in PrestoStats for every game to correspond with the StatBroadcast event. Starting a new game without first updating the path may result in overwriting final stats from a previously completed game.

2.1 Login to Presto Stats

2.11 When completed successfully, the username and path shows on the updated Partners screen

You can now begin scoring your event in PrestoStats.

Note: If the game is already in progress, it can take several plays/minutes before Presto's feed begins.

3. Updating the XML Path

Every game/event on StatBroadcast has a unique Game ID and XML filepath.

You will need to update it on PrestoStats every time before you start a new game.

If not already completed, you will need to login, select your sport and team and navigate to the Stats tab, as described in the previous steps. You will also need to retrieve the XML Path from StatBroadcast.
